black-green black-grey-red

Colours for Terrace-Tile "Elegance"

white-grey-black (2) black-grey

Colours for Terrace-Tile "Eifel"

white-grey-black (2) black-grey

Tolerances and note about material

The printed colours do not match the original colours exactly. Samples will be supplied upon request. Tiles or Elements manufactured out of EPDM Granules have a longer lasting colour stability, compared to coloured black granules. Nevertheless a change in colour over the period of years can not be avoided due to UV-Light and other environmental-effects. If not stated differently all black surface rubber used in our tiles is coloured black EPDM. Black EPDM holds all colours much better than Recycled Tire Granule and is therefore superior in colour-stability.

(2) The proportion of darkgrey, lightgrey and white can vary between tiles.
