

Polyurethane-Glue OC500

Article number 94PUOC500

Colour grey

Unit 310ml cartridge

Characteristics Humidity-responsive polyurethane adhesive for bonding rubber elastic plates and rubber safety elements. Due to its solid consistency, this adhesive is excellently suited for side bonding of fall protection and elastic plates with each other

Min. temperature for use 5 degrees Celsius

Viscosity „stiff“

Precautions The processing must always be done with gloves. If necessary, we will provide you with a safety data sheet at any time

Places of use Bonding of open-pored rubber floor coverings and safety elements

Installation Suitable for bonding open-pored rubber floor coverings and safety elements. Product should not reach the surface of the products. Remove supernatants immediately during processing.

Processing only possible with cartridge gun (not included)

Please note the installation instructions for the respective products

Material & Tolerances Never process in conjunction with moisture, otherwise the adhesive foams. Product contains diphenylmethane-4,4'-Di-isocyanat. Shelf life according to label – usually 6 months from the date of delivery in the unopened original container. On problematic surfaces, trial processing is recommended.
